# SANDVIK Hack Saws & Blades

From Sandvik's own mines comes the purest Swedish iron ore to be molded into the world's finest tool steel. The ore is refined and rolled into hack saw strips in Sandvik's own steel mills thus maintaining complete control of production from ore to finished product. Special hardening methods are employed assuring exceptional sharpness and flexibility. Any blade or frame believed to have a flaw should be returned to Sandvik Steel Inc., Finished Products Division, 1702 Nevins Road, Fair Lawn, New Jersey for examination. No replacements can be made prior to examination by us.

## SILVERFLEX BLADES (FLC 2524)

A unique hardening process leaves the center portion of the blade malleable for extreme flexibility of the entire blade but provides superior hardness and durability to the cutting edge. Available with 18, 24, and 32 teeth per inch. Thickness, .025 in.

### 50 BLADE CARTONS

No.	Length	Teeth Per In.	Width	Weight (per 100)

# SANDVIK Fish & Hook Brand Chisels

Designed for the professional, yet priced to suit every budget, this new, popular line of chisels is offered with the following features.

#### BLADE

The "Fish & Hook" trademark means the blade is made from the finest Swedish tool steel with the correct hardness for a tough, longlasting edge. The blade (4" in length) has a professional full bevel pattern and is coated with a clear plastic that prevents rust.

#### HANDLE

The new, flat shape permits better work control and more comfortable grip. The handle is made of a special tough, unbreakable, black plastic compound.

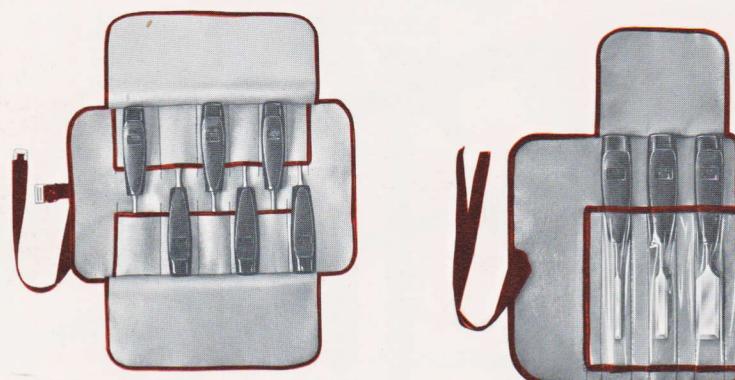

#### PACKAGING

Each chisel has its own individual display package for peg board or rack mounting. The orange and black design is colorful and eye-appealing to attract sales and yet offers ample edge protection.

34 lbs., 4 oz.

421-3-S  
WOODSMAN  
(FLC 2470)

421-1-S CAMPER (FLC 2471)

The SANDVIK Bush Axe has a tough, durable cutting blade that enables it to slice through young springy saplings. It is the answer to one of the woodsman's most troublesome hazards . . . injury with his axe as a result of its deflection by tough, resiliant young stems.

Because the SANDVIK Bush Axe is light-weight, it cuts faster and easier with less fatigue than an ordinary axe or machete. It can cut through a 3" stem with less effort and its overall length of 28" and general design makes it great for cutting from awkward positions low to the ground or high overhead. Its correct balance makes it ideal for one hand cutting while holding the stem or other brush aside.

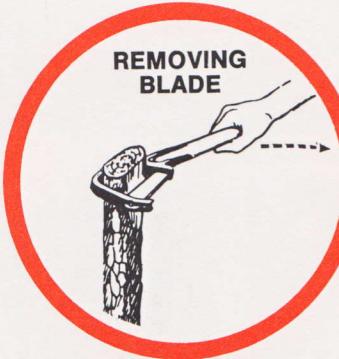

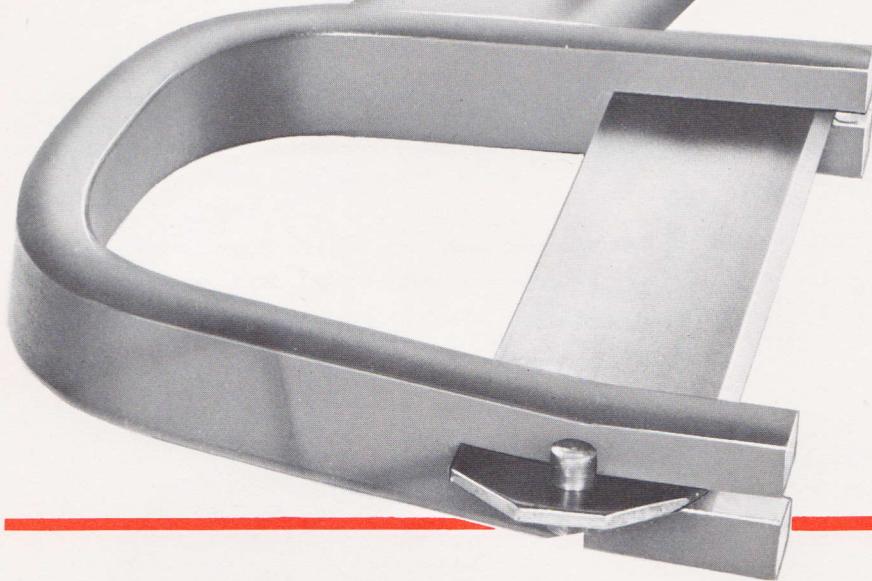

Swedish steel, 7" replaceable blades are finely honed and razor sharp. Extra blades can be conveniently carried in the pocket and quickly changed in the field.

## SANDVIK No. 1 Bush Axe

for clearing brush  
and saplings . . .

easier, faster,  
safer . . .

### SPECIFICATIONS

#### BUSH AXE COMPLETE

Overall length ..... 28 in.  
Weight each ..... 2.2 lbs.

## Sandvik Steel CABINET SCRAPERS

This scraper blade is designed for use in a scraper plane or can be used by hand. The blade is made from a specially hardened and tempered Sandvik steel and is available in two sizes and two gauges. Packed 10 to a carton.

Number	Size	Gauge	Weight Per Carton
No. 474	5" x 2-1/2"	23	15 oz.
No. 474	5" x 2-1/2"	21	15 oz.
No. 474	6" x 2-1/2"	21	1 lb., 6 oz.

## Sandvik Steel HOOF KNIVES

These knives have blades of "laminated" steel . . . a layer of specially hardened steel fused between two layers of malleable steel. Blades are firmly set in handles of tough birch. Available for right or left hand use. Packed 10 to a carton.

No. 180 (right hand) blade length 2-3/4 in. Weight per Carton 1-1/2 lb.

No. 171 (left hand) blade length 2-3/4 in. Weight per Carton 1-3/8 lb.

No. 188 Double edge length 3 in. Weight per carton 1-1/2 lbs.

Skillful tempering of the finest Swedish Steel has made these scythes famous the world over. The famous fusing method of construction forms a blade which holds an edge much longer than ordinary blades. Sharpening is simple. The hard center can be felt on the stone when reached. All scythes are designed to fit any American snath and are warranted to hold their cutting edge and guaranteed against manufacturing defects.

## Swedish Steel SCYTHES

### FLC 1221

(All scythes packed 12 to a carton)

#### NO. 24 BRUSH SCYTHE

Popular, low cost brush scythe. For cutting underbrush. Although lighter than the No. 25, it is exceptionally rugged and will give years of service. Heel width, 3 inches.

	Length	Weight per carton
No. 24	20 in.	20-1/2 lbs.

#### NO. 25 BRUSH SCYTHE

Extra heavy design with solid ribbed back; rugged construction, and wide blade for cutting bushes and underbrush. Heavy shank is more rigid than ordinary weed scythes. Heel width, 3½ inches.

	Length	Weight per carton
No. 25	18 in. 20 in.	26-1/2 lbs. 27 lbs.

#### NO. 9 FINNISH HAAPAVESI PATTERN

Extremely light and narrow grass scythe. Reinforced back gives extra rigidity. Heel width, 1½ inches.

	Length	Weight per carton
No. 9	28 in. 30 in.	18-1/2 lbs. 19 lbs.

#### NO. 11 DUTCHMAN PATTERN

Outstanding combination grass and weed scythe with popular Dutch heel. Ribbed back to withstand hard, rough handling. No excess weight, and perfectly balanced. Heel width, 2½ inches.

	Length	Weight per carton
No. 11	24 in.	20-1/2 lbs.
	26 in.	21 lbs.
	28 in.	21-1/2 lbs.
	30 in.	22 lbs.

#### NO. 5 SWEDISH LIGHT PATTERN

Wide, reinforced heel to handle the toughest of grass. Designed to cut close to ground and is recommended because wide heel causes grass to fall forward in place. Width at heel, 3¼ inches.

	Length	Weight per carton
No. 5	26 in.	19 lbs.
	28 in.	19-1/2 lbs.
	30 in.	20 lbs.

## From SANDVIK...STEEL TO SHAVE THE WORLD!

For over thirty years Sandvik has been the largest supplier of high quality razor blade steel, not only for the leading American razor blade manufacturers, but also for the razor blade industry the world over. Our leadership is not a mere stroke of luck. It is backed by concentrated and intensive research. □ Our Steel Research Center is continually creating and testing new steel grades, heat treating and hardening processes. Sandvik is the world's leading producer of spring steel, power springs, welding wire, tubing and pipe, steel belt conveyors and tungsten carbide metal cutting tools.

SANDVIK ALSO  
MANUFACTURES THE  
WORLD'S FINEST HANDSAWS
